JIRA Issue Collector

By Innovate365 GmbH

Table of Content

Requirements

After installing the JIRA Issue Collector app, you can create a JIRA Issue in the JIRA instance of Innovate365 GmbH.
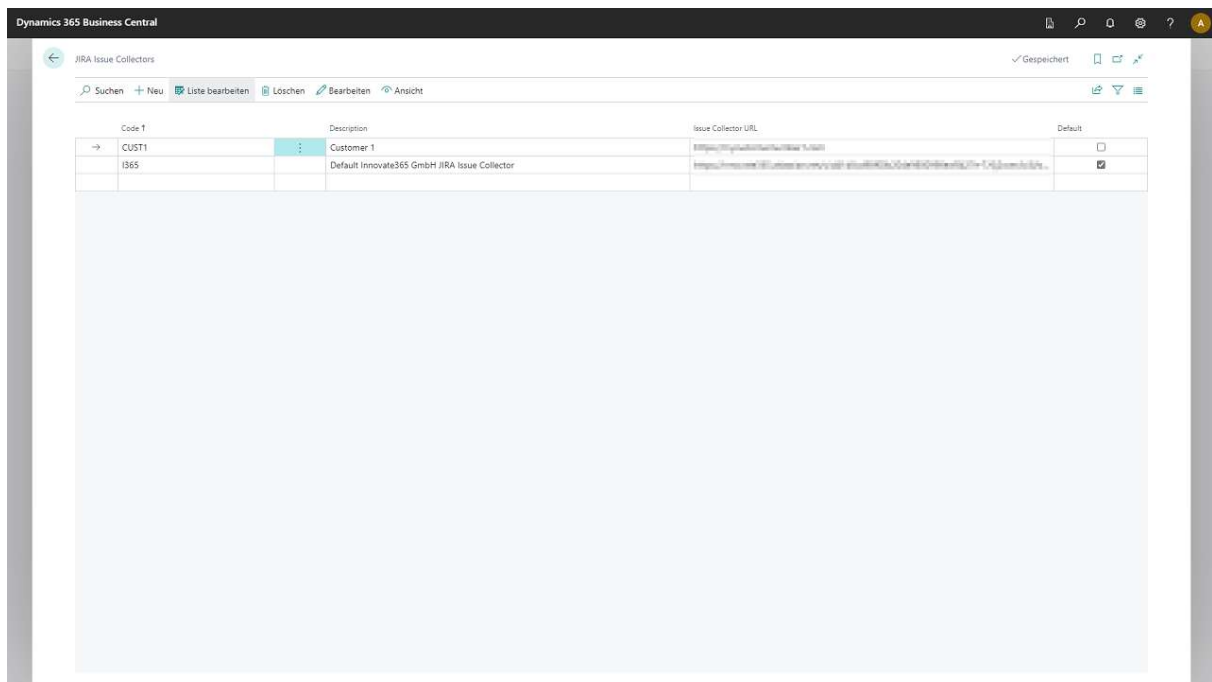

If you want to access your own JIRA environment, you must own a license for JIRA and create an issue collector. Use this link to see how you can create an issue collector:

https://support.atlassian.com/jira-cloud-administration/docs/use-the-issue-collector

Setup your own Issue Collector

In Business Central search for "JIRA Issue Collectors". A list page will be opened where you can setup multiple collectors. The URL must be a valid and secure URL.

You can specify one collector as your default one. The default one will be opened when you search for "JIRA Issue".

Use the Issue Collector

You can open the default issue collector when you search for "JIRA Issue" and open the page. Other collectors you can open from the page "JIRA Issue Collectors" by viewing the card page of one entry.
